BEHAVIOR BASED ENGINEERING COLLABORATION TOOL

CAASE18 – The Conference on Advancing Analysis & Simulation in Engineering Cleveland, OH – June 5-7, 2018

NAFEMS Americas and Digital Engineering (DE) are teaming up to present CAASE, the Conference on Advancing Analysis & Simulation in Engineering, June 5-7, 2018 in Cleveland.

CAASE18 will bring together the leading visionaries, developers and practitioners of CAE-related technologies in an open forum, unlike any other, to share experiences, discuss relevant trends, discover common themes, and explore future issues.

The conference will cover a wide range of topics, addressing every aspect of engineering analysis and simulation during a 3-day program articulating around 4 key themes:

- Driving the Design of Physical Systems, Components & Products
- Implementing Simulation Governance & Democratization
- Advancing Manufacturing Processes & Additive Manufacturing
- Addressing Business Strategies & Challenges

As a long-term partner of NAFEMS, DPS will hold a booth at the conference.

We will present a paper focusing on knowledge management and the growing need of capturing, sharing and re-using data and information across multiple tools, disciplines, entities, and companies to foster and ease Engineering Collaboration which constitutes one of the biggest challenges for the future of the industry.

This presentation will illustrate how we implemented this approach through an aerospace customer's project by means of karren.
